Bullwip™

Step 1: Request Demo & Pricing

Test features and functionalities that are crucial to meet your objectives. We will provide a competitive quotation based on number of units and any other one-off setup costs. Visit **www.bullwip.co.uk** to register.

Step 2: Proposal

We will develop a clear implementation plan, including timelines, training for staff, and a strategy for integrating the software into existing workflows.

We can then agree T&Cs.

Step 3: Data Migration & Functional Set Up

Security configurations, data mapping, data cleansing, validation, and testing to ensure that all data is accurately and securely transferred without loss or corruption.
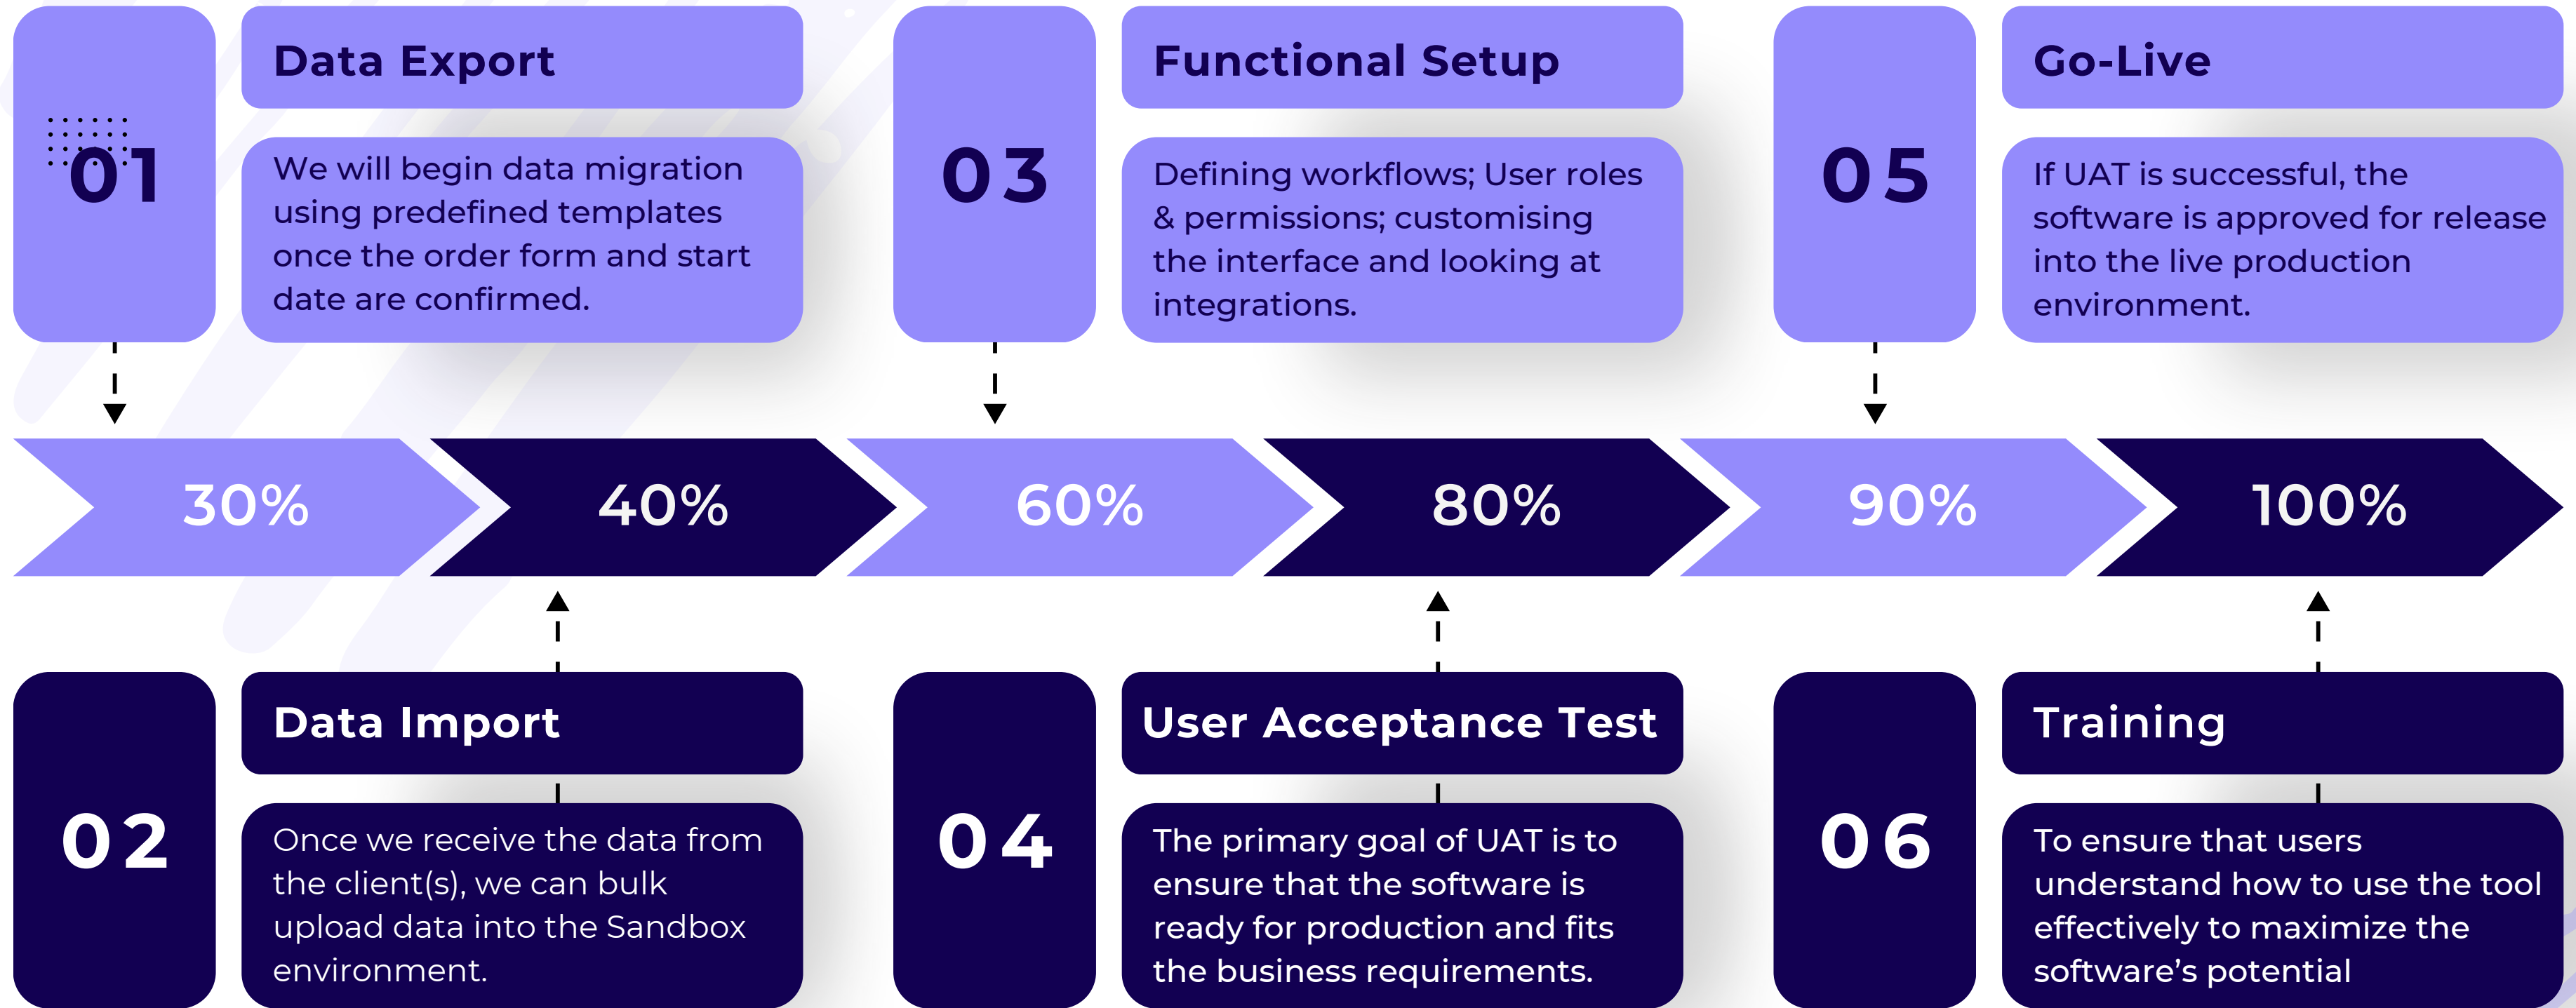

Step 4: Go-Live

User Acceptance Testing (UAT) and go live in production environment.

REGISTER NOW

01
Data Export
We will begin data migration using predefined templates once the order form and start date are confirmed.

02
Data Import
Once we receive the data from the client(s), we can bulk upload data into the Sandbox environment.

03
Functional Setup
Defining workflows; User roles & permissions; customising the interface and looking at integrations.

04
User Acceptance Test
The primary goal of UAT is to ensure that the software is ready for production and fits the business requirements.

05
Go-Live
If UAT is successful, the software is approved for release into the live production environment.

06
Training
To ensure that users understand how to use the tool effectively to maximize the software's potential
